Marshall, Minnesota | (507)817-9236 | aayushgairay143@gmail.com | www.ayushgaire.com

FOUNDER & CEO — Codyza

SUMMARY

Motivated and result-driven Computer Science student at Southwest Minnesota State University with a strong passion for software development, full-stack web applications, and technology-driven innovation. Skilled in problem-solving, programming, and multicultural collaboration through academic projects, leadership roles, volunteer experiences, and international experiences across Nepal, Japan, and the United States. Experienced in frontend and backend development, cloud integration, portfolio development, and real-world project deployment. Founder of Codyza, where I develop modern digital platforms and collaborate on innovative technology projects. Eager to continuously grow technical expertise while contributing to impactful and innovative environments.

EDUCATION

Southwest Minnesota State University — Marshall, MN

Bachelor of Science in Computer Science

Anticipated: May 2028

Relevant Coursework: Programming Fundamentals, Data Structures, Problem Solving, Computer Science Concepts, Web Development

TECHNICAL SKILLS

Programming Languages: Python, C (Proficient), Java, HTML, CSS, JavaScript

Frameworks & Technologies: React.js, Node.js, Express.js, Vite, Supabase

Concepts: Data Structures, Abstract Data Types (ADT), Frontend & Backend Integration, Database Management, Problem Solving, Team Collaboration

Tools & Platforms: Git, GitHub, Render, Supabase, VS Code

Languages: Nepali (Native), English (Fluent), Japanese (Advanced), Hindi (Advanced), Urdu (Intermediate), Spanish (Basic)

PROJECTS

QuickNotes — Full-Stack Note-Taking Web Application

Live Demo: [QuickNotes Demo](#)

December 2025

- Developed a modern full-stack note-taking web application using React, Vite, and Supabase
- Implemented secure user authentication and session management functionality
- Integrated cloud database services for real-time note storage and synchronization
- Designed a responsive and modern dark-themed UI for desktop and mobile devices
- Applied frontend and backend integration concepts in a deployable real-world application
- Strengthened practical skills in full-stack development, database systems, and cloud technologies

Technologies Used: React.js, Vite, JavaScript, Supabase, HTML5, CSS3

PIXEL — Image Processing & Optimization Web Application

December 2025

- Developed a full-stack image processing application using Node.js and Express.js
- Built image resizing, optimization, flipping, rotation, and format conversion features
- Implemented Sharp library for high-speed image transformation and optimization
- Added preset dimensions for social media platforms including Instagram and YouTube
- Used Multer for secure and efficient file upload handling
- Managed deployment and version control using Git, GitHub, and Render

Technologies Used: Node.js, Express.js, Sharp, Multer, JavaScript, HTML5, CSS3, Git/GitHub, Render

THE BASICGAMES — Multi-Game Web Platform

2026

- Developed a modern browser-based gaming platform featuring multiple interactive games and responsive UI systems
- Implemented game logic, animations, futuristic interface designs, and interactive user experiences
- Integrated multiple game modes including puzzle and strategy-based gameplay experiences
- Designed and optimized frontend performance for desktop and mobile compatibility

- Managed version control, deployment workflows, and project updates using Git and GitHub

Technologies Used: HTML5, CSS3, JavaScript, React.js, Node.js, Git/GitHub

PROFESSIONAL EXPERIENCE

Codyza — Founder & CEO

Marshall, MN / Remote | 2025 – Present

- Founded and developed Codyza, a technology-focused platform focused on software development, digital innovation, and collaborative projects
- Designed and developed multiple modern portfolio websites and web solutions for clients, students, and personal branding projects
- Led frontend and backend development projects using modern web technologies and deployment platforms
- Managed branding, project coordination, volunteer recruitment, and technical development operations
- Built and maintained responsive websites and digital platforms with a focus on clean UI/UX design and real-world deployment
- Collaborated with international volunteers and developers through remote teamwork and project management

American Red Cross

Information & Planning Volunteer Generalist

Southwest Minnesota | May 2026 – Present

- Support disaster response information and planning operations
- Assist with communication, coordination, and emergency preparedness activities
- Participate in volunteer training and operational support programs
- Demonstrate teamwork, leadership, and community service skills
