EDUCATION

Southwest Minnesota State University, Marshall, MN

Expected May 2028

- *Bachelor of Science in Computer Science*
- *Relevant Coursework:* Data Structures & Algorithms, Software Engineering, Database Management Systems, Computer Networking, Advanced UNIX Programming, Object-Oriented Programming, Statistics

TECHNICAL SKILLS

Languages: Python, C, C++, Java, JavaScript, TypeScript, HTML/CSS

Frameworks & Technologies: React, Next.js, Node.js, Express.js, Tailwind CSS, Supabase, PostgreSQL

Developer Tools: Git, GitHub, Vercel, Render, VS Code, Linux/UNIX

Spoken Languages: Nepali (Native), English (Fluent), Japanese (Advanced), Hindi (Advanced)

PROJECTS

NepalDisaster.com, Software Engineer / Contributor

2026 - Present

- Contributed to a real-time disaster information platform designed to make flood and emergency information more accessible across Nepal.
- Helped shape the **live-data pipeline and flood-alert system**, transforming incoming disaster data into usable information for the platform.
- Contributed to the **bilingual Nepali/English interface** and collaborated on frontend, backend, and data-integration functionality with an emphasis on reliability and practical use.

Namaste Kalika, Full-Stack Developer

2026 - Present

- Engineered and deployed a production bilingual web platform supporting **two restaurant locations in Japan** using Next.js, TypeScript, PostgreSQL, Supabase, and Vercel.
- Developed backend workflows for menus, sales, staff access, and administration; implemented authentication, role-based authorization, **Row Level Security (RLS)**, audit logging, and protected workflows.
- Built database migrations, menu/data import workflows, automated validation/testing, responsive UX, and Japanese/English SEO improvements for real-world restaurant operations.

FarmFix, Full-Stack Developer

July 2026 - Present

- Developed a full-stack agricultural equipment platform for maintenance schedules, repair histories, service records, and equipment tracking using Next.js, React, TypeScript, Supabase, and PostgreSQL.
- Implemented authentication, protected routes, role-based access, PostgreSQL-backed CRUD workflows, responsive dashboards, reminders, and reusable application components.

TECHNICAL & LEADERSHIP EXPERIENCE

Codyza, Founder & CEO, Marshall, MN / Remote

2025 - Present

- Founded a volunteer developer community focused on building and shipping collaborative software projects; lead distributed developers and volunteers through planning, implementation, testing, Git/GitHub collaboration, and deployment.
- Coordinate frontend/backend development, technical decision-making, project execution, volunteer assignments, and production releases across multiple projects.

American Red Cross, Information & Planning Volunteer Generalist, Southwest Minnesota

May 2026 - Present

- Support disaster-response information, planning, communication, preparedness training, and operational coordination with volunteer teams.

LEADERSHIP & ACHIEVEMENTS

Southwest MN Hacks, 3rd Place / Bronze Medal, Southwest Minnesota State University

Sept. 12-13, 2026

- Earned **3rd place** in a 24-hour university hackathon as part of a four-person team; built **FORESIGHT**, a workforce intelligence platform for identifying skill gaps, knowledge risks, workforce readiness, and succession coverage.
- Developed and presented an interactive prototype featuring workforce analytics, what-if simulation, talent matching, employee profiles, and AI-assisted mitigation recommendations.

International Student Organization, SMSU, Program Coordinator

2025 - Present

- Help organize multicultural programs and student-engagement activities supporting SMSU's international community.

Competitive Canoeing, Kagoshima Prefectural Team, Japan

2024

- Selected for Kagoshima Prefecture's four-member canoeing team and competed in national-level events in Japan.
